Art Unit: 2172:

#### **DETAILED ACTION**

1. This office action is in response to the preliminary amendment filed on May 15, 2001, which claims 1-15 are presented for examination.

#### **Drawings**

2. Applicants are required to furnish the formal drawings in response this office action. No new matter may be introduced in the required drawing. Failure to timely submit a drawing will result in **ABANDONMENT** of the application.

# Information Disclosure Statement

3. The information disclosure statement filed on July 3, 2001, complies with the provisions of M.E.P.. § 609. It has been placed in the application file. The information referred to therein has been considered as to the merits.(see attached form PTO-1449).

### Claim Objections

4. Claim 11 is objected to because of the following informalities: claim 11 recites "the computer readable medium of claim 9" in line 1. It is noted, however, claim 9 recites a method of claim 1. In claim 12, line 3, after "library file;" please insert an --and--. Appropriate correction is required.

Art Unit: 2172:

Claim Rejections - 35 U.S.C. § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the

basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or

on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-11 are rejected under 35 U.S.C. 102(b) as being anticipated by May et al (hereinafter

"May") US Patent no. 5,544,354.

As to claim 1, May discloses a system for accessing a large database of information using both

browsing and searching behaviors. In particular, Campbell discloses the claimed features "displaying

in a matrix area on the display a matrix having a plurality of cells and a plurality of icons displayed

in one or more of the cells, each icon corresponding to an elements in the database" (col.5, lines 27-

47; col.6, lines 44-63; col.7, lines 1-25; col.26, lines 60-65; col.24, lines 49-51); "receiving an icon

selection signal in response to a user selecting one of the icons with the user interface selection

device" (col.11, lines 10-65; col.26, lines 60-65); and "in response to the icon selection signal

displaying a corresponding element" (col.11, lines 1-65; col.27, lines 3-15).

As to claim 2, May discloses the claimed features "wherein the matrix includes row headings and

column headings, the row headings identifying sources from which the elements are obtained, the

column headings identifying subject matter to which the elements relate" (col.8, lines 5-60; fig.12).

Page 3

Page 4

Art Unit: 2172:

As to claim 3, May discloses the claimed features "changing a visually perceptive characteristic of one of the icons in response to step (b)"(col.9, lines 35-47; 50-63).

As to claim 4, May discloses the claimed features "receiving from the user a search request input from a user input device" (col.26, lines 60-65); and "changing a visually perceptive characteristic of icons that correspond to elements that satisfy the search request" (col.12, lines 30-39).

As to claim 5, May discloses the claimed feature "periodically changing, without intervention by the user, the element that is displayed" (col.12, lines 30-39).

As to claim 6, May discloses the claimed feature "wherein the element comprises a textual image" (col.9, lines 35-47).

As to claim 7, the limitations of claim 7 have been noted in the rejection of claim 1 above. In addition, May discloses the claimed feature "wherein the element comprises a textual excerpt" (col.9, lines 35-47).

As to claim 8, May discloses the claimed feature "displaying in a title relating to the element" (col.5, lines 27-47); and "displaying in a source location a source of the element" (col.12, lines 15-25).

Art Unit: 2172:

As to claim 9, May discloses the claimed feature "wherein the user selects the icon by superimposing a pointing indicator on the icon" (col.9, lines 60-64).

As to claim 10, the limitations of claim 10 have been noted in the rejection of claim 1 above. In addition, May discloses the claimed feature "displaying in a file location of the display a file" (col.12, lines 15-25).

As to claim 11, May discloses the claimed feature "receiving a search request from a user" (col.26, lines 60-65); and "changing a visually perceptive characteristic of icons that correspond to files that satisfy the search request" (col.12, lines 30-39).

## Claim Rejections - 35 U.S.C. § 103

- 7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 8. Claims 12-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over

Art Unit: 2172:

May et al (hereinafter "May")US Patent no. 5,544,354 in view of Burnard et la (hereinafter

"Burnard") US Patent no. RE37,722.

As to claim 12, May discloses the claimed feature "a database of textual excerpts" (col.25, lines 23-

32). However, May does not disclose the cited features "a translator configured to combine the

textual excerpts into a library file"; and "a computer configured to combine source code and the

library file into a single executable file".

On the other hand, Burnard discloses an user interface objects that store in a user interface object

archive which is a database physically located in the shared library of an association application

program in order to facilitate preparation of an application developed in one language for use in an

are which uses another language. In particular, Burnard discloses the claimed features "a translator

configured to combine the textual excerpts into a library file" (col.11, lines 42-67; col.30, lines 15-

26); and "a computer configured to combine source code and the library file into a single executable

file" (col.7, lines 40-57; col.8, lines 37-57).

Therefore, it would have been obvious to one of ordinary skill in the art of data processing, at the

time the present invention was made to combine the teachings of the cited references. One having

ordinary skill in the art would have been motivated to utilize the teachings of Burnard into the system

disclosed by May in order to allow newly created user interface object to use the redesigned

construction program which are stored in an archive

Page 6

Art Unit: 2172:

As to claim 13, Burnard discloses the claimed feature "including a content editor coupled to the database of textual excerpts" (col.3, line 26-col.4, line 7).

9. Claims 14-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Burnard et la (hereinafter "Burnard") US Patent no. RE37,722.

As to claim 14, Burnard discloses the claimed feature "creating a database, an element library containing a plurality of database elements having a common format" (col.8, lines 38-57); "creating source code for a user interface that permit a user to view the database elements" (col.8, lines 38-57); and "compiling the element library and the source code to create an executable computer file which, when executed, permits the user to display the database" (col.8, lines 38-57). May does not explicitly disclose the use of compiling the element library without reference to non-compiled data. However, Burnard discloses a system to provide a user interface archiving system which facilitates the translation of the text in an application to an alternative language. Therefore, one having ordinary skill in the art at the time the invention was to modify Burnard's system to incorporate the use of compiling the element library without reference to non-compiled data in order to allow newly created user interface object to use the redesigned construction program which are stored in an archive.

As to claim 15, May discloses the claimed feature "containing a computer executable file" (col.7, lines 40-57).

Art Unit: 2172:

**Conclusion** 

Page 8

10. Any inquiry concerning this communication or early communication from the Examiner

should directed to Jean Corrielus whose telephone number is (703) 306-3035. The Examiner can

normally be reached on the weekdays from 7:00am to 5:30pm.

If attempts to reach the Examiner by telephone are unsuccessful, the Examiner's supervisor,

Kim Vu, can be reached on (703)305-9343.

Any response to this action should be mailed to:

Commissioner of Patents and Trademarks Washington, D.C. 20231

or faxed to:

(703) 746-7239, (for formal communications intended for entry)

Or:

(703)746-7240 (for informal or draft communications, please label "PROPOSED" or "DRAFT")

Hand-delivered responses should be brought to Crystal Park II, 2021 Crystal Drive, Arlington.

VA., Sixth Floor (Receptionist).

lean M. Corrielus

Patent Examiner
